Transformational Aspects of the Therapy Relationship

4/13/19 with Bill Edkins, PsyD, PsyD

COURSE DESCRIPTION:

Much research on outcomes in psychotherapy has focused on the pivotal role of the therapy relationship, regardless of the approach. Psychoanalysis has a great deal to say about key components of this relationship. We will examine what these components are from the contributions of psychoanalytic thought past and present. Emphasis will be on practical clinical applications of these transformative encounters so that participants will be able to utilize them in their practices.

COURSE OBJECTIVES:

1. Participants will be able to identify and better understand what psychoanalysis has developed over the past century regarding the therapy relationship.
2. Participants will learn how to create an environment and relational presence that will optimize the transformational aspects of psychodynamic psychotherapy.
3. Participants will be better able to apply these to their practices.

ABOUT THE INSTRUCTOR:

William L. Edkins, Psy.D., Psy.D. is a Supervising and Training Analyst at Newport Psychoanalytic Institute and the Los Angeles Institute and Society for Psychoanalytic Studies. He is also on the faculty of both institutes. He has practices and taught for the past 38 years and is a Fellow of the International Psychoanalytical Association.
